

# Intentions

## Anberlin

They say my vice should be vanity  
But I'll stay calm in industry  
I'll motivate you till you think I'm right  
I'll leave exactly where we started tonight  
Where we started tonight My ambition is all that I have  
There's a tension when you want it so bad  
We will move on, we will move on  
We will move on, we will move I want a love that I don't deserve  
I want the gold that I didn't earn  
I want a fire that will never burn  
I want you there, I want you here tonight  
(I want you there, I want you here tonight) My ambition is all that I have  
There's a tension when you want it so bad  
We will move on, we will move on  
We will move on, we will move on Your attention to the matters at hand  
Your intentions are yet to be had  
We will find you, we will find you  
We will find you, we will find My ambition is all that I have  
There's a tension when you want it so bad  
We will move on, we will move on  
We will move on, we will move on Your attention to the matters at hand  
Your intentions are yet to be had  
We will find you, we will find you  
We will find you, we will find We will move on, we will move you
