Fly

Emily Clibourn

I wanna love you like you and I will never die
You should know, you should know, you should know
I wanna be inside all the things you like
You should know, you should know, you should know

All the roads, yeah the roads all lead to ya
Pull me in, hold me closer

And I know now all the reasons why I cannot tell you how I feel inside

All these days Iâ€™ve been changing
All this love it is spinning
All my fears, they are dimming
Oooh

Heavy love makes my blue, hesitant that Iâ€™ll crush you
Youâ€™re on my mind
Want you to love me like you and I will never die
You should know, you should know, you should know

And I know now all the reasons why I cannot tell you how I feel inside

All these days Iâ€™ve been changing
All this love it is spinning
All my fears, they are dimming
I let them fly, fly, fly, fly

At night my mind keeps on turning
I try to say the things that I cant say but you can feel
And you are just like a statue
Standing in my heart, you know theyâ€™ll never take you away, away, away, away

All these days Iâ€™ve been changing
All this love it is spinning
All my fears, they are dimming
I let them fly, fly, fly, fly

And I love you, thatâ€™s the reason why
