

How Many People

Ayo

How many people really speak their minds?
How many people really stand for something?
How many people go and follow blind?
How many people, tell me, how many people?
How many people really speak yheir minds?
How many people really stand for something?
How many people go and follow blind?
How many people, say, how many people?
How many times did I say things I didn't mean.
Out of worry that people could dislike me?
How many times did I buy things I didn't need,
'cause I paid for the name instead of quality?
How many times did I waste my blessings,
just like the money for material possessions?
How many times did I base my decisions,
out of prejudice or other people's visions?
Can you tell me,
How many people really speak their minds?
How many people really stand for something?
How many people go and follow blind?
How many people, tell me, how many people?
How many people really speak yheir minds?
How many people really stand for something?How many people go and follow blind?
How many people, tell me?
How many people, tell me?
How many times did you talk behind somebody's back?
Out of envy, you've lied and said what you've said
How many times did you truly have regrets?
And did you ever try to make it unsaid?
How many times did you waste your blessings
Just like the money for material possessions?
How many times did I base my decisions,
out of prejudice or other people's visions?
Now can you tell me,
How many people really speak their minds?
How many people really stand for something?
How many people go and follow blind?
How many people, tell me, how many people?
How many people really speak their minds?

How many people really stand for something?
How many people go and follow blind?
How many people, tell me, how many people?
How many people?
Say, how many people?
Do you really stand for something?
