

The Man You've Become

Zarni Devette

Tiny little hand round my finger
Met you baby boy as timid mother
I Didn't know the first thing bout what to do
But somehow I was already great at loving you Finally saw my miracle there you close
Perfect face angel skin ten fingers ten toes
How could I have known that you'd keep getting better
And that my love would keep growing forever

I give you the best of my heart and my grace
There when you need anytime any day
My joy is in knowing you've found the one
And my sweet sense of peace, the man you've become
The man you've become

Seeing now the two of you together as one
Knowing that she'll care for and cherish my son
And when my time is gone and through
I know my love lives on in you
