

Real

William Shatner

I have saved the world in the movies
So naturally there's folks who think I must know what to know
But just because you've seen me on your TV
Doesn't mean I'm any more enlightened than you
And while there's a part of me, in that guy you've seen
Up there on that screen, I am so much more
And I wish I knew the things you think I do
I would change this world for sure
But I eat and sleep and breathe and bleed and feel
Sorry to disappoint you, but I'm real
I'd love to help the world and all its problems
But I'm an entertainer, and that's all
So the next time there's an asteroid or a natural disaster
I'm flattered that you thought of me
But I'm not the one to call
And while there's a part of me, in that guy you've seen
Up there on that screen, I am so much more
And I wish I knew the things you think I do
I would change this world for sure
But I eat and sleep and breathe and bleed and feel
Sorry to disappoint you, but I'm real
