

Oblique City

Phoenix

I wanted out of the biblical bets
Oblique city, credentials
It's everything that I've ever known
Coca-Cola's Rosetta Stone Atlantis if I really find it
Velocity, potentially
Not the logic of the momentum
It's way more than tragic I never knew what to do
To show you better than lonely Am I gonna do this alone?
They're fifty thousand versus one
Am I gonna do it all?
Am I gonna do this alone?
Or will you join me versus wrong
Come on, come out and get me I wanted odd, it was even and planned
Oblique city, potential
She's everything that I've ever won
Who wants the bronze, the silver, the gold? Atlantis if I really find it
Complexity, essentially,
Not the logic of the momentum
It's way more than tragic I never knew what to do
To show you better than lonely Am I gonna do this alone?
They're fifty thousand versus one
Am I gonna do it all?
Am I gonna do this alone?
Or will you join me versus wrong
Come on, come out and get me Coca-Cola beaten-up bottles
Is there anything lost
Is there anything wrong with me?
Buried Mayan numerals
Is there anything else
Is there anything more for me?
Or anything else for me
