

Chemistry

One Night Only

Maybe it's the chemistry
The sparks that fly from you to me
I touch your skin, I feel alive
Been searching for you every night
Where am I supposed to go?
I'm hoping that you won't say no
We've got all the time in the world
It must be the chemistry
Tonight
I hope that you know
I won't let you go this time
It must be the chemistry
Between you and I
I hope that you know
I won't let you go this time
Underneath the starry sky
You can bring me back to life
I touch your skin, I feel alive
Been searching for you every night
Take me somewhere I don't know
Watch all the people down below
We've got all the time in the world
It must be the chemistry
Tonight
I hope that you know
I won't let you go this time
It must be the chemistry
Between you and I
I hope that you know
I won't let you go this time
Yeah, yeah, yeah, yeah
Yeah, yeah, yeah, yeah
Yeah, yeah, yeah, yeah
It must be the chemistry
Tonight
I hope that you know
I won't let you go this time
It must be the chemistry
Between you and I

I hope that you know
I won't let you go this time
