Back to You

Trembling Blue Stars

I can always find
A pathway that will wind
Back to you - it's an easy game
Back to the angel I sent awayAfter all this time
Before I know it I'm
Back to you - in need again
Who's going to love you quite the same?Though you sometimes seem to need it
I know my love won't be rewarded
Still I see you as a jewel
Still I carry my torch for youI wish I could have written
The song that would have broken
Your heart again
So you could only
Make your way
Back to meThough we've been apart
Longer than we were together
I'm still all adrift
Something still hasn't mendedThough we've been apart
Longer than we were together
I'm still all adrift
Something still hasn't mended
