

Speed of Light

Twinemen

From across the halo of the beautiful Earth
Summer and winter caught a glimpse
Just a glimpse began the wretched birth
Of an endless love between her and him (no speed of light, no speed of sound, no speed of light,
forever) Summer left his message in the seed
That winter held back to her heart
Their prayers will lean on December winds
And the answer was the heart is part (no speed of light)
No speed of light
No speed of sound
(no speed of sound)
Meet either one
Spin fast around
(no speed of light)
No speed of sound
No speed of light
So forever (forever), forever,
We can never be together
