

# Space Cadet (Grabo'sky Desert Rework)

## Kyuss

I'm standing alone on the cliffs of the world  
No one ever tends to me  
Sitting alone, covered in rays  
Some things are so my mind can breathWaiting is hard, fucking takes so long  
Draped in sun, hands in sand  
Earth acid cleanses me, cleanses me clean  
But the world it never comesIt never comes  
It never comes  
It never comesI lay on my side in the edge of the room  
She never expects anything from me  
When all the days, the days of the year  
I know I miss that part of meWaiting is hard, fucking takes so long  
Draped in sun, hands in sand  
Earth acid cleanses me, cleanses me clean  
But the world it never comesIt never comes  
It never comes  
It never comes  
It never comes  
It never comes
