

# Star Machine

## Bob Mould

You had a chance to go around the world  
But you had to be a silver bird  
A revelation wouldn't matter much to you  
So I heard you bought a lousy dream  
You took a number from the star machine  
The star machine is spitting numbers all on you  
You say it  
You say it  
You say it  
You say it  
You leave your family and some friends behind  
It wasn't long until you lost your mind  
The star machine is doing fine, but how are you?  
You told the world you had to fire the band  
Your little world has gotten out of hand  
The star machine will hand your ass right back to you  
You say you want it, you say you need it (You say it)  
You say it's everything you ever wanna be, yeah (You say it)  
The star machine is coming down on you (You say it)  
And you and you and you (You say it)  
You say you want it, you say you need it (You say it)  
You say it's everything you ever wanna be, yeah (You say it)  
The star machine is coming down on you oh yeah (You say it)  
Now it's getting hot in here  
I'm doing everything you want me to  
But nothing's ever good enough for you  
You sign on right out of here  
You say you want it, you say you need it (You say it)  
You say it's everything you ever wanna be, yeah (You say it)  
The star machine is coming down on you (You say it)  
and you and you and you (You say it)  
You told your story, how you were treated (You say it)  
You couldn't handle it, and now you feel defeated (You say it)  
Your star machine has taken all away from you and you and you (You say it)  
You say it, and you  
You say it  
You say it
