Quick

Far

You had enough yet?
Your wish came true today
Robbed on crosses, studied stars
Wished to be somewhere better
Then where you were
Well here you are. Are you happy?
Had enough? I tried, I swear
It was more that I could bear
Change the changes, fix me quick
Stick the needle in it's not enough
yet... I want love and I dont want
to care. You want love and you
don't want to care? What?
