

Nineteen

Buck-O-Nine

Not long ago, there was a time
When everything would blow my mind
Then I'd learn a bit more, learn a bit more
It canceled everything I learned before
Said, Hey, I don't know what I'm doing
Should I plan on my class reunion?
I've been working on the vision of clarity
This is how it boils down to me
Well, anything is possible
Yeah, anything and everything
Anything and everything
Said, anything is possible
Yeah, anything and everything
Anything and everything
Is possible, is possible to me
Well, was nineteen, I thought I'd seen
Everything I was gonna see
Then I'd see a bit more, see a bit more
Canceled everything I'd seen before
Said, Hey, I thought I knew it all
I was setting up for a hell of a fall
Writing down my philosophy songs
There's one that still holds strong
Said, anything is possible
Yeah, anything and everything
Anything and everything
Said, anything is possible
Yeah, anything and everything
Anything and everything
Is possible, yeah, is possible to me
With everyday that goes by
The less and less, I wonder why
'Cause I've seen 'em rise and I've seen 'em fall
But I'll never claim to have seen it all
I said, Hey, I ain't seen a thing
You never know what tomorrow will bring
Been working on a state of mind
Brace yourself for the ride
'Cause anything is possible
Yeah, anything and everything
Anything and everything
Said, anything is possible
Yeah, anything and everything
Anything and everything
Is possible, is possible, is possible
Is possible to me, to me, to me, to me
