Inertia Rhapsody

Cherry Poppin' Daddies

Better that we keep our mysteries intact But you're ringin' through my chains So no disessection, there's no charm in that In a way beyond explainin' Frayed old flame, we're not the same Obsession and disgust an avalanche of thought I am a monster at least that's what i thought Frayed old flame, we're not the same But you're ringin' through my chains Look here at me for once i'm sittin' still Before you leave i want you to look over In a way beyond explainin' The past is dead and all is forgiven -- to be real This barn is red, these hills are green with summer You loved a failure, now i'm just a man Petals start to snow from her half open hands I kick my feet in the ashes of defeat and All those questions that i won't ask Remain in love When i look around at the sky up above Know that when push comes to shove
