Produced by Diezel

Mixed by Diezel

Mastered by EDan

(IN HINDI

Giving u signs

Lover lover lover

I've hidden my nights dream in my glance

Lover lover lover

I've decorated my wishes in my gesture..my signs)

CHORUS

Giving u sign

Im hoping that u will just read my min

U know I wanna get get it

Oh my lova u can help me get it

I know u feel me and I can feel u too

Ur aura kinda sticky u got me like glue

I will not regret there is no redo

Placing a new bet my knots undo

Deep inside I know u seethru

Strait to the source now begin me n u

Sayin nothin feel a jungle there is no zoo

Free to make sound an-a-mal will comes thru

I the got signals can u catch this

My inside tingles my eyes they undress

I see your souls love releasin the stress

Slow the rolls unceasing while u bless

I will not touch u just feel my vibe

Every side, unwind and then we stop time

You know what I need and just what to do

You leave then I bleed pls say that its not true

My bodyâ€™s open and I vibrate

A subtle motion while u contemplate

Is she for me well what else you got boo

These other girls aint got nothin I do

Not tryna brag no its bout the yin and yang
She was off balance baby I am ur miss thang
U know my hips bang u wanna say my name
Last life u couldnâ€™t hang u thought I was insane
We gotta change thangs I hope you know this
But now the time space it has left you open
Jump out the rat race and get to hopin
Got work ahead babe no time for mopin
Align it real straight Get me in your Focusi
in comparison know I am the dopest
This is something else we chose before breath And we will never part
I'm yours beyond death
