

Rescue Me (Instrumental)

You Me At Six

I know I'm finding it hard to breathe
And I've been drowning in my own sleep
I feel a hate crashing over me
So rescue me, so rescue me Everybody need to drive before we break out like hives
Gotta learn to put this shit we call pride to the side
I ain't no player, without you I'm not OJ
Viva La Vida, now she wanna give me Coldplay Once you find you can't keep it
You broke my heart into million tiny little pieces
And now it's purge on you, never put hurt on you
Talking to your girlfriends, tryna find dirt on you Damn, is this what we have come to?
When he was cheating I was the person you run to
Guess it's for another time, this is what I've come to find
Should've seen this coming but Stevie Wonder, love is blind I know I'm finding it hard to breathe
And I've been drowning in my own sleep
I feel a hate crashing over me
So rescue me, so rescue me She used to be the person of my dreams
And now she's just a demon of my nightmares
I know this shit ain't what it seems
Hey, hey you ain't leaving, I'll be right here Shorty just rescue me, I know you especially
The way I always felt with you
Thinking that true telepathy
Like the age and their games We used to be blinding
Who would have thought that when you left
The right would become the wrong thing I know I'm finding it hard to breathe
And I've been drowning in my own sleep
And I feel a hate crashing over me
So rescue me, let's go, so rescue me And I've been drowning in my own sleep
And I feel a hate crashing over me
So rescue me, rescue me, so rescue me
