

All the Girls Are Complicated

[Laura Cantrell](#)

All the girls are complicated
All the girls will work you hard
And they break their hearts
It's just who they are
They're just working out who they are All my friends are raving mad
Make me so crazy but you know I'm glad
That I've got someone I can lean upon
Oh and I know I am not the only one From the ones who tend their looks
To the ones that mind their books
To the one who got her hooks in you
You know she doesn't have a thing to prove All the girls are complicated
Every one is precious too
And you might get lucky if you do
Oh you might get lucky if you do Find the one who makes you glad
Find the one that takes your breath
Well you won't get everything that you want
Oh but you'll need one to dote upon Listen close to her
Just as if your life depended
It's never just the words
Feel your way and you mend it All the girls are complicated
Every one is precious too
And you might get lucky if you do
You might get lucky if you do All the girls are complicated
All the girls will work you hard
And they break their hearts
It's just who they are
Oh they're just working out who they are
