Say The Words

Matt Bianco

Ask and I will give you
all you have dreamed of, I could
but you never say the words
never say the words
You can never say the wordsThough I know your name
I don't know who you really are
Do I make yolu happy
Do you cry inside
Because you never say the words
never say the words
So I... I never say the wordsCall me and I will find you
and tell me how we got lost on the way
Call me and I will guide you
to help you get safely home one dayI'm looking in your face
for someone I thought I knew
Hope to find the reason
to fall in love again but you...
you never say the words
never say the words
You can never say the wordsLook at us - we should be thankful
After all - we've got everything
and others in the world
would be grateful
for a chance of having half as muchSo call me...Try and I will follow
I'll stay here forever, I could
but we never say the words
never say the words
We can never say the words
