

Woman

Donna Summer

Girlfriend can we talk, well I have something to say
Girl when you're dealing with your man
There just ain't no easy way, no easy way
But I wanna tell you this Woman, treat that man real good
Woman, like you know you should God, He made the woman, God, He made the man
Know just what He wanted in His master plan
Want your man to love you with all his heart and soul
Let him be who he is, let him take control You're a woman and you got the right to be one
Let him know it, let your life begin to show some Woman, treat that man real good
Woman, like you know you should Want him to be faithful, love and understand
You want him to be kind then be your lovin' man
Forget about the hard times, think about the good
That's when he will treat you just the way he should You're a woman and you got the right to be one
Let him know it, let your life begin to show some Woman, treat your man real good, treat him good
Woman, like you know you should Woman, treat that man real good
Woman, like you know you should You're a woman and you got the right to be one
You're a woman
You're a woman and you got the right to be one
You're a woman Woman, woman, woman, woman
Woman, treat your man real good
Woman, woman
