Carried Away

Sloan

She found a way to test my open mind
She got together with another and went on to find
There's more to this
Now what are we to do?
Was it just a kiss? 'Cause now she loves him, too.She carried on, but she got carried away
She told me the story, she told me that day
She carried on, but she got carried away
I didn't really mean it but I said it's okay
She carried on, but she got carried awayNow she can't forget him 'cause she's not so good at letting go
It's waking up without him that she finds upsetting, so
She's closed her eyes
Now she must open them
And realize, no one can have it allShe carried on, but she got carried away
I looked and I listened, but what could I say?
She carried on, but she got carried away
I let her sleep on it, but one of these days...
She carried on, but she got carried awayI know no one is going to love her more
She wants to think about it
Sure she should, but there's the doorShe carried on, but she got carried away
She told me the story, she told me that day
She carried on, but she got carried away
I let her sleep on it, but one of these days...
Carried on but she got carried away.
Think it over, but don't overthink it.
Carried on but she got carried away.
I looked and I listened but what could I say?
She carried on, but she got carried away.
