

Little Something (feat. Justine Suissa)

Above & Beyond

Too many hours on the road
Too many days as you grow older
And tears are spilled
As each moment unfolds
Your head is resting upon my shoulder
And I'm quietly thrilled
Did I miss that smile?
Did I miss that first step?
All the moments you supposed
Not to forget
You are my little something
It's like you came from nothing
And now you're everything to me
I used to fear what you bring
I didn't know if I could love you
The way you deserve
You make me feel like a king
A day is no longer what I get through
You're my everything
Did I miss that smile?
Did I miss that first step?
All the moments you supposed
Not to forget
You are my little something
It's like you came from nothing
And now you're everything to me
You are my little something
It's like you came from nothing
And now you're everything to me
If I could turn back time
And be there for every minute
Give up the life I chose
Just to have you in it
If I could turn back time
And be there for every minute
Give up the life I chose
Just to have you in it
