

# I Can't Say

## The Trews

f you break that's all you can do  
My mistake was I thought more of you  
If you find yourself beside me looking for some faith  
I can't say that our world is safe  
When I'm on my way to another lonely place  
Lasting heartache is now in view  
A cold dark shade that once was you  
If you find yourself beside me looking for some faith  
I can't say that our world is safe  
When I'm on my way to another lonely place  
I can't say that our world is safe  
When I'm on my way I'm sad to leave this  
Pale eyes on a sullen face

Frail ties and time misplaced  
time misplaced  
So if you break that's all you can do  
My mistake was I thought I knew you but  
Colours bleed through, Colours bleed through  
And you who I thought that I knew  
Colours bleed through  
I can't say that our world is safe  
When I'm on my way to another lonely place  
I can't say that our world is safe  
When I'm on my way with the will to leave this place  
yeah yeah yeah yeah  
Colours bleed through  
Colours bleed through
