

Silence

Hindi Zahra

Silence in my heart
And my poor bones are tired
I was lost in the crowd
I was a fool before I knew you
There will be a time
When you will leave
For another one
Easy,
How you can play
How you can say goodbye But my heart started
And never wanna stop again
My heart started
And never wanna stop
My heart started
And never wanna stop again
You are my homeland
And my sunlight
If you come to me
Sooner or later we will see
The beauty that you said
Will never be
It will grow from the dust and
Will turn to be the best Cause you know my heart started
And never wanna stop again
My heart started
And never wanna stop
Oh no no no
My heart started
And never wanna stop again
You are my homeland
And my sunlight
You came into my heart
And my world started changing
You are the reason why
I still wanna try
Love
In every places
In every secret parts
And in the silent move

You make over over me You came to me that day

For a reason I couldn't say

I just know that from that time

My heart couldn't resist to your smile

Believe me

Or leave me

I will stay by your side

I will stay by your side

I will stay by your side

I will stay by your side
