Evil

Tales Of Terror

There's too much evil under the sun
Is there a war worth being won
Nobody cares about anybody else
They're only thinking, only of themselvesI don't care about you
Why should you care about me
You don't care for me
Why should I care about you
When will we ever figure it out
We are just animals
Peace will never workThere's too much evilI don't care about you
Why should you care about me
You don't care for me
Why should I care about you
When will we ever figure it out
We are just animals
Peace will never workThere's too much evil under the sun
Is there a war worth being won
Nobody cares about anybody else
They're only thinking, only of themselvesWe are just animals, peace will never work
All we ever do is, rape from the earth
Don't even frown
Don't even cry
The whole human race, just has to dieI don't care about you
Why should you care about me
You don't care for me
Why should I care about you
When will we ever figure it out
We are just animals
Peace will never work
