I Want You By My Side

Technotronic

Strange as the night but her love was alright
I know I want you by my side
She was strange as the night but her love was alright
I know I want you by my side, listenFirst time that I saw you was like you stepped out of a magazine
Your lips just a ruby red, but how many colours in your hair
Your style so divine, oh how I wished you were mine, Baby
Physical attraction, girl, from the look of your stance
And the way you look out of your eyesMy approach was soon to score
That's why I'm knocking on your door
Standin' there with roses in my hand
Hopin' that you'd understand
The way I feel 'bout you Baby
And I wish you were mine, BabyPhysical attraction, girl, from the look of your stance
And the way you look out of your eyesShe was strange as the night but her love was alright
I know I want you by my side
She was strange as the night but her love was alright
I know I want you by my side, foreverI want you by my side
I need you to be my guide
