I Still Gotta Live With Myself

Natural

Here I am standing alone and I talk with my heart in my hand
My mind's stuck on pictures of you,
People we knew, candle light dinner for two
I keep on going around
And the things, baby, I could have said,
Like there's no one above you,
That's why I adore you,
Now all I'm left is regret
[CHORUS:]And I can't go back anymore
I can't go on living a lie
I've got to face up now, it's do or die,
Or I'm gonna drown in these tears that I cry
And I can't keep regretting the day
We wished on a star that's just too far away
There is nowhere to turn my cry for help
And I still gotta live with myself
Here I am missing you so
And I wonder if now is too late
What I wouldn't give for one more tender kiss

There's so many visions of you that I miss
I still picture us walking on down the bay
Laughing and holding you in the rain
Now I know I need you
But baby don't say goodbye
I'm on my knees praying to God
[CHORUS]Don't you remember when we first met
Neither of us was experienced yet
But we took it real slow
It was touch and go
How can you say it's over when I love you so
[CHORUS]There is nowhere to turn my cry for help
And I still gotta live with myself
I'll never love another like you, like you
