

Into The Sun

Agnes

We walk the streets, we follow light
I follow you
You take me on, you lead the night
I stick to you
You hear my heart, won't beat ahead
You draw me in
You take the night, one step ahead
You let me in
Out of the fire
and into the sun
we are drowning
in the bright light
Out of the fire
and into the sun
we are dancing
'till the night dies
Out of the fire
and into the sun
we are blinded
by the big lights
Out of the fire
and into the sun
we are dancing
in the sunrise
We leave the streets, we fly away
too high to reach
We walk alone from here to way
way out of reach
I hear the sound from deep within
one beat ahead
We're closing in, I see the edge
one step ahead
Out of the fire
and into the sun

we are drowning
in the bright light
Out of the fire
and into the sun

we are dancing
'till the night dies
Out of the fire
and into the sun
we are blinded
by the big lights
Out of the fire
and into the sun
we are dancing
in the sunrise

We are starlight, black sky lit up
We are starlight, black sky lit up
We are starlight, black sky lit up
We are starlight, black sky lit up

Out of the fire
and into the sun
we are drowning
in the bright light
Out of the fire
and into the sun
we are dancing
'till the night dies
Out of the fire
and into the sun
we are blinded
by the big lights
Out of the fire
and into the sun
we are dancing
in the sunrise
