

Take It Slow

The Mallett Brothers Band

Your days going to come,
Baby, so they say
But don't get caught up,
Don't get carried away
'Cause it will only stick around for a minute or two
Then down the road will be the same old blues
If you feel like somebody's kicked you right in the ass
You gotta let it pass

'Cause the sun's gonna be there when you rise again
You gotta open up the windows and let it all in
Times like these that you can't hide from
So you can stand right there in the sun
Or you could always run,
But that ain't no fun

You can't slow down
You can't sit still
But the morning comes like they always will
When the sun comes up you gotta fill that cup
And your flat tire runs on the ground
And you're getting real low cause you're hanging round
Baby, can't you see
You gotta let it be

Well your day's gonna come, Baby, so they say
Don't get so excited that you float away
If you only stick around for a little while
Then the blues come down you could run and hide
Or just let it slide

'Cause it's cold times here but that's alright
Just shut all the shades and bundle up tight
Light that fire that you always lit when the sparks fly out of the spit
When you could run and cry or just let them fly

You can't slow down
You can't sit still
But the morning comes like they always will, like they always do
Put on those shoes and you'll be up all night

But you make out good cause you realize
Life's not a game you know
You've got to take it slow.
