Good Love

Lucy Pearl

Good love will make you cry Good love will last until you die When I woke up this morning Autumn leaves just pass me by Saw this couple just crying And in my mind I wonder why I could tell it was special 'Cause something felt so true yeahThat's the thing about true love That is the way I want to be happy with you Good love will make you cry Good love will last until you dieNow I'm speaking as a woman Raised with a mother's love She said you better recognize The truth from liesIt's in the eyes Gotta look beyond what you see It's so much deeper that visually Let's come together just you and meLook and see through the trees The journey of Good love will make you cry Good love will last until you dieLove can make you warm Or it can make you very cold If you listen to your heart The truth will unfoldWhen you find that honey, honey That touches you on sight You should never fight that feeling 'Cause good love's so rightGood love will make you cry
