

I'll Be on Your Side

Brett Dennen

Whenever you are on the outside
And need a little compassion
Don't know the ground you're stepping on
And you're a long way down
From where you're standing
And all your lighthouses are gone Reach out your hand
I will make it easier
And forever by your side
All apart, I'll be on your side
There is a radiation
That's been mistaken
An invisible thread, between us all
So here I am, full of mistakes
Caught in a hologram, a wonder wall Reach out your hand
I will make it easier
And forever by your side
All apart, I'll be on your side
When nothing left is broken
And you hear the calling
I'll be the love that liberates
And you'll fly away
I'll run below you
You won't owe me anything
