

# Life of the Party

## The Weeknd

Welcome to the other side  
You're lost  
Baby satisfy your mind  
You've been really gone  
You've been really gone  
You've been thinkin' 'bout it baby since I put you on  
She got money to blow  
Just look at that nose

Prescription ain't it  
You can mix it with the uh  
And if you wanna do it, baby  
I'll inhale with you  
I'm on cloud nine  
Baby you're behind  
You can follow me

You can follow me if you want to  
Go downtown with the drugs in your body  
Take that step, you're the life of the party  
Know that step, you're the life of the party

I got two little ladies  
I got one little room  
There's a room full of n\*\*\*\*s  
Baby what you wanna do?  
The way you move got me feeling so uh  
I been thinking about it baby  
I been thinking about it lately

I'm so far gone and you are too  
Show me how you go downtown  
With the drugs in your body  
Take that step, you're the life of the party  
Know that step, you're the life of the party

I love how you touch  
How you feel  
How you breath

Baby how you do it so good

How you twist with your hips got the room so slow baby

Girl please don't go

You're gonna please my boys

You've been thinking about it baby

Yeah you're a star

Oh you want my love?

Girl you know what to do

Girl, there's one two three

Go downtown with the drugs in your body

Take that step, you're the life of the party

Know that step, you're the life of the party

---
