# Thank God for Worker Bees

## Botch

listen to what i have to say to you
painful repetition - comes and goes again
painful repetition - comes and goes again
and it goes
so now i'm the human
now i'm the human shield
finest engineering - we've ever seen
finite enginerring - it never leaves
never leaves
and that's why
we dine on your design
i like the look on your face
it's bittersweet, and lasts
for six hours
alone for one day and six hours
