

# Thank God for Worker Bees

## Botch

listen to what i have to say to you  
painful repetition - comes and goes again  
painful repetition - comes and goes again  
and it goes  
so now i'm the human  
now i'm the human shield  
finest engineering - we've ever seen  
finite engineering - it never leaves  
never leaves  
and that's why  
we dine on your design  
i like the look on your face  
it's bittersweet, and lasts  
for six hours  
alone for one day and six hours
