

Heart Of Hearts

Great Big Sea

I drove a million miles with you
I broke a million smiles with you
I told a million lies with you
What else would I do?

We answered every siren's call
We watched the stars come out and fall
Stood back to back against the wall
We ran before we crawled

All together now un-til the end
When this story's over a new one begins
And in my heart of hearts
There's a special place
For every man who shook my hand
And every girl who kissed my face
In my heart of hearts, there hides no shame
In my heart of hearts I'd do it all again

You always said we were the lucky ones
You always said the night had just begun
We always stayed up till the morning sun
And whistled something to the dawn

All together now un-til the end
When this story's over a new one begins
And in my heart of hearts
There's a special place
For every man who shook my hand
And every girl who kissed my face
In my heart of hearts, there hides no shame
In my heart of hearts I'd do it all again

Never had a destination or a port of call of mind
Never had a chart to guide us down the tide
Never had no money, but I always had the time
To finish all your lives

[Bridge]

So far behind us, so far to go
A melody reminds us, what we've always known
Time will never find us in the secrets of the show
Up or down below
So on we go

All together now un-til the end
When this story's over a new one begins
And in my heart of hearts
There's a special place
For every man who shook my hand
And every girl who kissed my face
In my heart of hearts, there hides no shame
In my heart of hearts I'd do it all again
In my heart of hearts I'd do it all again
In my heart of hearts I'd do it all again
