Growing Into You

Soul Asylum

You never grow out of mischief making
You never grow out of taking
You never grow out of complicating
When simple things are waitingBut I'm growing into you
I'm growing into youThere's one thing that I know that's perfectly clear
You never grow out of fear
You never grow out of contemplating
When it ain't worth debating
You never grow out of mistake making

You never grow out of fakingBut I'm growing into you
I'm growing into youThere's one thing that I know that's perfectly clear
You never grow out of fear

You never grow out of fearI'm growing into you I'm growing into youThere's one thing that I know that's perfectly clear

You never grow out of fear You never grow out of fear You never grow out of fear You never grow out of fear

You never grow out of fear And will I ever, ever, ever get over it? Get over it, get over it
