Love's Dart

Django Django

You ride out into the strongest sun and you know
Gonna leave you for dead as the sun over head you dont shun
thirst comes on and the water is all you want
But there's gold in your eyes and it keeps you alive to move onLoves dart
No longer sharp
The end is in sight
but your aim takes you out of the mark
Loves dart broken apart
If your walkin in circles
you'll find yourself back at the startThe wind kicks up and the day grows sooo old
If you keep on going you'll make it out of this dust bowl
You think of the one you knew that was so fair
You remember about the girl with the golden hairLoves dart
No longer sharp
The end is in sight
but your aim takes you out of the mark
Loves dart broken apart
If your walkin in circles
you'll find yourself back at the startIn the near distance you see a form
You recognize the face but your feelin warm
rub your eyes and see theres no one around
lie down for a while and she'll stay with you till you move onLoves dart
No longer sharp
The end is in sight
but your aim takes you out of the mark
Loves dart broken apart
If your walkin in circles
you'll find yourself back at the start
