

# I Didn't Believe (Special Features Remix)

## Flight Facilities

You're the ghost in my arms,  
That never troubled me, that never troubled me  
Until now  
All the forces are at work now, as the town begins to sleep  
I could cast my doubt and live on without,  
You never asked me why I didn't believe that something could really happen,  
Really happen between us  
I didn't believe that something could really happen,  
Really happen, really happen You're the voice in my head,  
That never left me alone  
That never left me alone,  
Until now  
Should I look to you for reasons, for the faith I never had  
I could hold my nerve for what I deserve  
You never asked me why I didn't believe that something could really happen,  
Really happen between us  
I didn't believe that something could really happen,  
Really happen, really happen between us, I didn't believe that something could really happen,  
Really happen between us,  
I didn't believe that something could really happen,  
Really happen Really happen, really happen, really happen  
Really happen, really happen, really happen  
Really happen, really happen, really happen  
Really happen, really happen I didn't believe that something could really happen,  
Really happen between us  
I didn't believe that something could really happen,  
Really happen, really happen, really happen between us,  
I didn't believe that something could really happen,  
Really happen between us,  
I didn't believe that something could Really happen, really happen, really happen, really happen.  
Really happen, really happen, really happen, really happen.  
Really happen, really happen, really happen, really happen.  
Really happen, really happen, really happen, really happen.
