Open Fire

Truth Before Treason

Go
Raise your hands of self destruction
Beat the life out of your corruption
No more life, no more tomorrow
Darkness fills your head with sorrow

(Pre-chorus) As you sit and wait to die
Ask yourself the questions why
Why you're running, why you're scared
Why it takes so much to care
Why is it so hard to see there is nothing left of me?

(Chorus) Open Fire - Flames grow higher

The world is spinning into darkness
Tell me it's alright, just tell me something
Take it all away, all away from me, yeah
Reality is setting in

Pre-chorus / Chorus

Annihilation, a state of decay
What makes you think they won't put you away?
They'll hunt you down, so prepare for a fight
It's us or them - it ends tonight

You run away from yesterday
You try to run but you can't get away
Sorrow is building everyday - I can't believe this
You try to run but you can't get away
When you run away from yesterday
Sorrow is building everyday - I can't believe this

No...
