

Harness and Wheel

The Kingsbury Manx

God loving boy with an ear against the wall
We understand where you're coming from
There's coal in the holes where your digging in the maw
We understand there should be a law That's what I heard
There's hard days to come with a burden on your back
We understand why your hands are black
Your harness and wheel drives a shoulder to the ground
We understand that you're leaving town That's what I heard
