

# Call 911

## Benny Benni

The sun no longer shines on your side  
Remember this cold  
When the fog won't lift in your town  
And you turn old  
I heard you killed your only friend last year  
You're such a disease  
You can buy your other friends  
But you can't buy me

### Chorus

Disarm, can you hear the British ambulance  
Breaking down, trick, bomb still goes

Tick tick time on by, watching me explode  
When did I create you?  
Did you ever destroy me?  
Can this be settled with questions?  
I can't think of anything.  
I'm just a little boy with an untrained voice  
But I have cannons for arms  
I play the guitar and songs  
With hidden missiles and bombs  
Repeat Chorus
