

# Wildfire

## Spooky Tooth

How many hearts can have everything  
Never ever found the one and all the fire it brings  
I wanna try more now, than I dared before  
I've got to know what passion is  
    Girl I've got to find the love  
    Day to day nothin' there, I had to let go  
    Heard a call that I resisted, 'cos it had no soul  
    When you get and never give it  
        It's so cold  
        You're something else, oh I know  
        I've got this wildfire that only grows  
            Every day it's in my soul  
            This wildfire, it's burnin' deep  
            It's burnin' deep, burnin' burnin'  
            Wildfire, it didn't take long  
            All my life is not too long  
            This wildfire is burnin' bright  
            Burnin' bright, burnin', burnin'  
            All, all around me  
            There's a fire that's catching on  
            Make a burnin' field of dreams  
            Little spark of light, touched and grew  
                Fed by all the love  
                That I'm feeling here with you  
                No one can believe it, but they can see  
                    Since we've been together  
                    You've made a change in me  
                    Bein' alone is so wrong, it's so so cold  
                    When somethin's right, ooh I know  
                    I've got this wildfire that only grows  
                        Every day it's in my soul  
                        This wildfire, it's burnin' deep  
                        It's burnin' deep, burnin' burnin'  
                        Wildfire, it didn't take long  
                        All my life is not too long  
                        This wildfire is burning bright  
                        Burnin' bright, burnin', burnin'  
                We gotta live to give, live and let love  
                Be here in the moment with the

One I want  
'Cos bein' alone is so wrong  
It's so cold  
When somethin's right, ooh I know  
Ooh I know  
I've got this wildfire that only grows  
Every day it's in my soul  
This wildfire, it's burnin' deep  
It's burnin' deep, burnin' burnin'  
Wildfire, it didn't take long  
All my life is not too long  
This wildfire is burning bright  
Burnin' bright, burnin', burnin'  
It's in my thoughts, everyday  
And I got this wildfire, burnin' on  
Not too hard to carry on  
Can't leave it, can't believe it
