Out of Body

Vada Wave

I wanted to be out of body
formless timeless oh
see myself swinging swaying but I know I cannot go and
I'm contemplating self-medicaticating these circles got me far from meditating we gotta get out of these habits habits and patterns and ghosts up like the flick of a lighter that start to sink down through the smoke I'm contemplating deliberating me and I and myself find this exasperating and we just go on living oooh oh we just go on living oooh oh I got to get out of this valley baby I'm findin my own seeking the mystic the shaman there's so much more I need to know

and I'm contemplating a self surrender my path is peaking starting to remember we gotta get outta the valley these winters they is no good Salty Lake Great beehive life smog hides the city lights

And I'm contemplating a transformation my bones are bending started separation and I just go on livin oooh oh oh ahhh da

We gotta get(x3) the valley oh oh oooh
I wanted to(x3) be outta body da da da
(Repeat above 3x)
I gotta get I wanted to I gotta get I wanted to beggoing to dying to make it through oooh
And I just go on living da da da
And I just go on living da da da
