Star Crossed

Gabriel Miller Phillips

Star crossed lovers, they say we're not meant to be
'Cause the stars in the sky and the fashion that they are aligned
I say if the future's been drawn out there's no point in living
I won't give up my love so that fate can have it's way
If the stars say that you couldn't love me
Are you telling me that you would listen?
If the words make their way from your mouth
Don't ask my permission, all is forgiven
Star crossed lovers, we do what we want to
Some learn the hard way, we all learn through consequence
I say if the future's been drawn out then nobody's living
I won't give you up, love, so fate can have it's way, it's way
If the stars say that you couldn't love me
Are you telling me that you would listen?
If the words make their way from your mouth
Don?t ask my permission, all is forgiven
Is it over?
(The stars keep this fire from burning out)
Is it over?
(Are you saying that you'd really listen?)
Is it over?
(The stars keep this fire)
Is it over?
(The stars keep this fire)
If the stars say that you couldn't love me
Are you telling me that you would listen?
If the words make their way from your mouth
Don't ask my permission, all is forgiven
If the stars say that you cannot love
(The stars keep this fire from burning out)
If the stars say that you cannot love me
