Never Die

Tiger Army

when the slumber of forever's called me home. i will not be gone, oh no you'll never be alone. my words will come to you cross time and space. you'll know where to find me and i'll be there... i'll be there. listen to the winds at night. you may hear me call your name. i once felt so alone but now i'm home. and i know that there is something beyond... the words i speak today shall outlive me. i call on forces that send chills down your spine. for i long to drink of immortality. of this nighttime stars, they speak to me. for we all shall someday part the veil and cross thru to the other side. in one way or another i shall live on and never die. in death as in life... i will arise. never... die! [x7] never die. all hail the darkness, in her majestic glory. she was always my true love, i never quite belonged here. though i've fallen so far from grace. please will you keep me in your memory. and a little place for me in your hearts. eternal soul never die.
