

Summer Rain

Cliff Richard

Come into my life and we will walk the road together
Happy with you I know I'll be
Someday you'll find me so that I'll belong to you Prepare yourself so to receive the love I give you
Happy to share now I'm aware of how much I need you
To be part of me oh can't you see that Summer rain will come again so the
Harvest is a good one
But if you don't respond to me I am lost
You're the only hope I have to bring
Forth the fruit in season
Now I know I need you to survive You, you are my dream - you make it seem
So very real
Taking my time, making me rhyme
When I'm walking again to find I cannot see the one
To whom I call - that I may be no more alone again
Happy to share now I'm aware of how much
I need you to be part of me oh can't you see that
