

Fight for Our Love

[Sarah Holthusen](#)

I don't want to cry
I don't want to say goodbye
But I will if you won't fight for our loveIt takes more than sayin' I love you
We need more than words to get us through
I need to feel that you will fight for our loveWe have a history a passionate story
But lately, we're most strangers than friends
All through the ages love really worth savin'
Has been battered and scarred
But it strengthen our heart and that's how you win the endI just want to hold you close to me
How I miss the way we used to be
Don't let it die, let's you and I fight for our loveOh, all through the ages love really worth savin'
Has been battered and scarred
But it strengthen our heart and that's how you win the endI just want to hold you close to me
How I miss the way we used to be
Don't let it die, let's you and I fight for our loveDon't let it die, let's you and I fight for our love
