

20

Justin Forrest

20 shadows 20 stars in my memory
12 months long lots of pages lots of worry
a lost soul and a lost mind and I try to leave it all behind
and 20 be good to me and 20 let my mind up...be free
does it feel alright when you're looking out the window at the night
and does it feel all wrong when you wake up and realize...I'm all gone
and 20 be good to me and 20 let my mind up...be free
and let the past never count and let the future call me out
and 20 let's make it the way we wish to see
oh I argue with my mind and demons blur the lines time after time
and their enemy is what I wanted to be and the way society caused me to see
I can see now I won't see
and 20 be good be and 20 let my mind be so free
let the past never count and let the future call me out
and 20 lets be the way we wish to see
