

# Skin Crawl

Serena Ryder

you make my skin crawl further than ever before  
my bones may be naked  
now but at least you're not passed out on my floor  
i watched you sneak away under my skin  
i watched you finish where i began  
i watched you sneak away under my skin  
i watched you finish where i began  
don't you know there's no such thing as people anymore?  
one rolled over and one fell out  
ones passed out on my floor  
don't care what they eat cause everything tastes the same  
we've all memorized their own set of rules to the same stupid fucking game  
i watched you sneak away under my skin  
i watched you finish where i began  
i watched you sneak away under my skin  
i watched finish where i began  
finish where i began  
finish where i began  
finish where i .....  
you make my skin crawl further than ever before  
my bones maybe naked now but at least you're not passed out on my floor  
i watched you sneak away under my skin  
i watched you finish where i began  
i watched you sneak away under my skin  
i watched you finish where i began  
i watched you sneak away under my skin  
i watched you finish where i began  
i watched you sneak away under my skin  
i watched you finish where i began
