

# Tainted

## MILKA

My face is powder white  
How could I ever be lonely  
I am my own embrace  
How could I ever be cold here  
There's fire in the sky  
There's fire in the sky  
To you my gratitude  
I've been inspired by your fears  
My heart belongs to you  
But do you really deserve it?  
There's fire in the sky  
There's fire in the sky  
Don't take my common sense  
Make me cold like you are  
Don't take what's left of me  
Redeem my whole life  
In previous lives you lied  
You cried you loved and you judged me  
Replace my body and soul  
To satisfy all your needs  
You showcased my weakness  
In the shelves of your mouth  
You showed me what pain is all about  
There's fire in the sky  
There's fire in the sky
