

Firecracker

The Bros. Landreth

Hey little firecracker, baby tell me where you've been
I've been searching far and wide for you
You didn't even call or write
Tell me what's this boy to do?
You walked out the door without a word But now the sun's coming up
Over main street and I ain't got a clue
Because the sun's going down
Over me and you When I close my eyes I still can see your face
Still hear the way you'd say my name
Oh and I bet you darlin'
Bet you my last breath
I still could find you in the dark
But now the sun's coming up
Over main street and I ain't got a clue
Because the sun's going down
Over me and you It's only shadows
Only ghosts of me and you
They'll haunt me
No matter what I do And I can't erase the sound
That my heart made when it all went down
But I still love you baby
And I always will
I always will
But the sun's coming up
Over main street and I ain't got a clue
'Cause the sun's going down
Over me and you Still love you, still love you baby
